Cross Examination (The Mystery Game that Improves Your Brain) is the literary version of Milton Bradleys Crack The Case game. It is a fascinating brain game of solving intriguing mysteries that two or more people can play instantly that requires no training, no cards, no dice, no table, no little plastic pieces parts, no fake money, no gimmicks and no substantial investment. Its enjoyed equally by both sexes and the young and old. It can be played as a book, e-book, on your cell phone, computer or mobile device, and it can be played anywhere in the car on family trips, in the office during breaks, long distance or in the flesh. It can be played by families, couples or teams, and this is the real bonus--it can be played either competitively or simply for fun. Cross Examination (the book) was licensed to Milton Bradley (Hasbro), which converted the book into a boxed game (Crack the Case) in 1993, which has consistently been awarded 5-star status by the game gurus around the world. The games inventor, Robert R. Schoch (www.RobertRSchoch.com) has reprised the game of logical forensic mystery solving both because it was never published, and because the world and media are now swirling with games designed to improve brain function and forestall the onset of age-related dementia. Recent university studies (e. g. Stanford University, 2013) are proving that exercising the brain with brain games improves brain functioning. Cross Examination is uniquely designed to exercise the brain (in a process we call Cognitive Calisthenics) and improve the all-important brain function known as Executive Cognition, that being the problem-solving faculty of the brain. But, compared to other so-called brain games presently on...
