By Theodore Simons

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Compressed Air: A Treatise on the Production, Transmission and Use of Compressed Air In preparing a second edition of this book, its character as an elementary treatise on the principles of Compressed Air has been maintained throughout. To bring the subject up-to-date, however, the greater portion of the chapter on Transmission has been re-written. Modern formulas were introduced with examples of their application. The important effect of altitude differences on Compressed Air installations has been illustrated by reference to new equations in Article 4 and by the example under Article 97. A new Table VIII, containing the principal Compressed Air formulas was substituted for the old table that has become superfluous. The obsolete Hurricane valve in Article 147 has been replaced by a description of the modern Ingersoll-Rogler valve. Altogether, a general revision of the original text and the addition of new material brings the second edition of the book abreast of modern theory and practice.
